(a) No person may subdivide or make any change in the use of land, or construct any system or structure, or change the size of a structure, except as exempted in section 50-48, without first obtaining a permit from the city engineer as provided herein. (b) For the purposes of this article, the following activities may alter or disrupt stormwater runoff patterns and will, therefore, unless exempt in accordance with section 50-48, require a permit prior to the initiation of any project: (8) Increasing the impervious area of any parcel of land. Disruptions to stormwater runoff patterns are prohibited whether by design or neglect. Alterations to stormwater systems are prohibited without first obtaining permits. **Specifically: The installation of the underlayment work for the artificial turf has changed the original overall subdivision site plan and construction plan and increased the imperviousness for the property, causing stormwater to flow onto neighboring property. Corrective Action: Either remove the unpermitted work and return the property to the approved site plan / construction plan with sod and submit a topography survey, including elevations of the neighboring properties, to show that it has been returned to the original approved site plan / construction plan or apply for a Land Alteration Permit from the City Engineering Dept. to modify the yard with the underlayment work and artificial turf and submit a topography survey, including elevations from the neighboring properties.**
